

# INTERNET XPRESS, INC.'s Website Security Policy

INTERNET XPRESS, INC. has implemented a website security policy to protect information of its website users.

## **Notice and Disclosures**

INTERNET XPRESS, INC. will not sell, trade, nor disclose the personally identifiable information of its website users to any unauthorized third parties.

## **Data Quality and Access**

INTERNET XPRESS, INC. may use cookies to enhance the website experience for its users. A cookie is a small file that is stored on the users hard drive. INTERNET XPRESS, INC. uses this file to maintain certain information about the user as they move between pages. Most browsers are shipped to accept cookies, but this is a function that can be controlled by the user. However, many of the services offered on the website may not run optimally or at all without cookies enabled.

While using the INTERNET XPRESS, INC. website certain information such as your IP Address and time spent on pages may be collected. This non-personal information is collected in order to monitor any unauthorized use or access to the INTERNET XPRESS, INC. site. Anyone caught attempting to harm, steal information from, or otherwise damage the INTERNET XPRESS, INC. website will be prosecuted to the full extent of the law.

## **Data Security**

When visitors use features on the INTERNET XPRESS, INC. website that involves the transferring of personal information such as credit card data, INTERNET XPRESS, INC. requires that a secure connection first be established using Secure Socket Layer (SSL) technology. During a secure SSL session, data passed back and forth between the user's computer and INTERNET XPRESS, INC.'s servers is secured through the use of public key cryptography. The user's computer exchanges key information with INTERNET XPRESS, INC.'s computers to create a private conversation that only the user's computer and INTERNET XPRESS, INC.'s systems may understand. To benefit from this security and to use many of the features on the INTERNET XPRESS, INC. site you will need to download a 128-bit enabled browser from Microsoft, Netscape, or another software company.

Each time you enter a secure connection while using the INTERNET XPRESS, INC. website your browser will notify you, unless the feature has been turned off. Please note that if you have left a secure connection all data sent to INTERNET XPRESS, INC. is over an unsecured connection.

Any data received through the use of SSL technology is maintained strictly out of the web root.

When a user sends e-mail messages to INTERNET XPRESS, INC., the return address may be used to respond to the inquiry. The content and address contained in the message will be permanently recorded so that it can be referenced in future communications between the borrower and INTERNET XPRESS, INC.. Email is not a secure means of transmitting information.

### **Hosted Domains**

INTERNET XPRESS, INC. expects all of its hosted domains to abide by the same policies as stated above. Violation of any of these policies may result in termination of the account at the sole discretion of INTERNET XPRESS, INC.

INTERNET XPRESS, INC. provides all domain account holders with a user name and password to access their domains and modify content. This information is only provided to the owner of the domain as shown in INTERNET XPRESS, INC.'s records. It is the domain owner's responsibility to secure this information and provide it to any third party web designers. If INTERNET XPRESS, INC. feels that a password has been compromised, it reserves the right to change the password without the domain owner's approval and without pre-notification.
